

100 solar panels installed by Warwick company to heat large pool

WARWICK - Local solar expert, Patrick Gallagher of Gallagher Solar Thermal in Warwick, just completed a 100 panel solar pool heating system at Camp Loyaltown in Hunter, N.Y.

The camp is owned by AHRC (formerly known as the Association for the Help of Retarded Children) whose mission is to teach, support and advocate for children and adults with intellectual and other developmental disabilities.

The AHRC camp had been heating the 9,000-square-foot pool exclusively with propane. The 4,800-square-foot solar panel arrangement, installed by Gallagher, is expected to slash the cost of heating this pool and reduce operating expense dramatically. Camp Loyaltown's pool is larger than almost a dozen 20' by 40' conventional backyard pools.

"Camp Loyaltown has the largest solar pool heating system that I am aware of in the region," said Gallagher. "I'm proud to have been chosen to install this system for such a worthwhile and forward-looking organization. Solar pool heating is simple and effective and we can install solar pool heating systems for any size pool at clubs, camps, municipalities or private backyards."

Gallagher argues that solar pool heating is the most cost-effective use of solar energy on Earth,

FYI

and that solar pool collectors will last from 12 to 20 years, which is more than three times the average life of a gas heater, electric pool heater or swimming pool heat pump and without the related service.

"We put the heat and the fun back into the pool without the shock of the monthly propane or electric bill," he said. "The right sized solar pool heating systems can make your pool 15 degrees warmer just from the sun and, if you use a pool cover to preserve heat overnight, the accumulated temperature will climb even higher."

Gallagher Solar Thermal can also install home use solar hot water for showers, laundry, and dish washing.

"It's simple and it works," said Gallagher.
